Statement of Carbon Offsetting and Credit

This statement is to confirm Speybank Limited has 322.36 tCO₂e of Carbon Offsetting Credit carried over from 2021-2023.

Carbon Audited figures for the business in 2023 totalled 75.87 tCO₂e, along with an additional 81 tCO₂e for estimated food and beverage emissions, totalling a requirement of 156.87 tCO₂e for the year.

Utilising these credits, and drawing down on the 322.36 tCO₂e outstanding, 156.87 tCO₂e will be used for 2023 emissions, leaving 165.49 tCO₂e in credit.

Carbon Neutral Britain Ltd can confirm 165.49 tCO₂e of carbon offsets are available for future use - mitigating emissions of the organisation.
